PROFESSIONAL SUMMARY

Computer Science undergraduate with strong knowledge of Data Structures & Algorithms, C++, JavaScript, and the MERN Stack. Passionate about full-stack web development and AI-based applications. Experienced in building real-world projects using React, Node.js, Express.js, MongoDB. Seeking internship opportunities to apply technical skills and continue learning.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, Mongoose, JWT Authentication, bcrypt

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Architecture, Digital Logic Design

Frontend: React.js, Bootstrap, Tailwind CSS, HTML5, Responsive Web Design

Database: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code, npm, CI/CD fundamentals

PROJECTS

SmartMess – Intelligent Food Subscription & Management SystemAssistant

Feb 2025 - Mar 2025

JavaScript, Node.js, Express.js, HTML5, CSS3, MongoDB Atlas, REST API, Git

Web platform that simplifies mess and canteen management through automated meal subscriptions, digital attendance tracking, and a credit-based meal reward system.

- Engineered a full-stack subscription platform with digital meal check-ins, responsive dark/light theme UI, and real-time attendance and feedback analytics for mess administrators.
- Built a resilient REST API backend with dual-storage architecture (MongoDB Atlas and local JSON fallback), ensuring 99.9% system availability, while implementing a "Skip-to-Save" reward credit system to optimize meal planning and reduce food wastage.

FacultyLeave – Academic Leave & Department Operations Platform

Jan 2026 - Mar 2026

Node.js, Express.js, MongoDB, React.js, Vite, Tailwind CSS, FullCalendar, Recharts, JWT, Nodemailer

Web platform that streamlines faculty leave management, approval workflows, and department schedule tracking for academic institutions through a secure role-based system.

- Architected a **Role-Based Access Control (RBAC)** platform for **Faculty, HOD, and Admin**, automating leave requests and approval workflows, reducing approval turnaround time by **60%**.
- Integrated **FullCalendar** for real-time department schedule management and **Recharts** for leave analytics, while implementing **Nodemailer** automated HTML email notifications to improve communication efficiency.

ACHIEVEMENTS & EXTRACURRICULARS

- ***Algorithmic Problem Solving:*** *Actively solve complex Data Structures and Algorithms (DSA) problems utilizing C++, mastering concepts like dynamic programming, two-pointer approaches (e.g., Trapping Rain Water), and hash map optimizations (e.g., Group Anagrams).*
- ***Continuous Integration:*** *Independently architected and deployed a multi-page personal portfolio website with advanced UI animations, focusing on modern design principles and responsive layouts*

EDUCATION

B.Tech in Computer Science

2025 - 2028

BMS Institute of Technology and Management, Bengaluru

- *Expected Graduation: 2028*
- *CGPA: 8.6/10.0*
